### **DETAILED ACTION**

This is in response to amendments filed on 2/22/06 in which claims 1-7, 11-22 and 24-36 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance. In addition the pending claims have been renumbered as 1-15, 17-32 and 16, respectively.

#### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art of record fail to anticipated or render obvious the following recited features: a delay line coupled to said electronic circuit, said delay line including a plurality of delay elements that are enabled by said thermometer-coded output signal; wherein said electronic circuit comprises comparator logic including a first comparator and a second comparator, and wherein said first comparator receives said binary output signal from said digital counter, and in response generates multiple threshold values as recited in claim 1. Enabling a delay line with said thermometer-coded signal to control the delay of said clocked signal and wherein converting the binary count value includes establishing a plurality of threshold values corresponding to said binary count value signal as recited in claim 19. Comparator logic that establishes threshold values for said binary output signal, and which generates a plurality of enable output signals based on said threshold values and a delay line that includes a plurality of transistor stacks arranged in parallel and wherein each of said plurality of said enable signals controls one of said plurality of transistor stacks to thereby control the amount of delay given to said clocked signal as recited in claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
